DRAFT -DELIBERATIVE* ATTORNEY-CLIENT PRIVILEGE

Call: **Ex. 6 - Personal Privacy**
Code:

Potomac 7301 EPA West is reserved. This mtg will end promptly at or before 2:00 pm Eastern.

Purpose: Reach EPA consensus on the border issue (heat loading may be coming across state line, ID-WA).

Objectives:

- n Understand what happened to the 2007 draft TMDL, which may provide valuable background. **(R10, All)**
 - o Was the 2007 TMDL http://www.deq.idaho.gov/media/571574-pend_oreille_river_temp_tmdl_draft_081007.pdf pulled off the street?
 - o Why was the 2007 draft TMDL an Idaho-Washington-Tribal effort?
 - o In the 2007 TMDL, it appears a day-to-day analysis (non-CFA) was employed as was the same model as the 2011 TMDL. Allocations were assigned to Albeni Falls Dam, and it appears we were able to meet WQS. Why was there no allocation to Albeni in the 2011 TMDL?
- n Discuss relevant language from the Multi-Jurisdictional TMDL draft document. **(Mike, Jim)**
 - o What is the temperature distribution throughout the river?
 - o How does it meet WQS?
 - o What are the implications for TMDL allocations and implementation strategies?
- n Discuss assessment of impairment at the border and documentation of border conditions/rationale. **(All)**

From Sarah's 6/25 email:

Ex. 5 - Deliberative

Region 10, we will be following up with you with questions about the 2007 draft Pend Oreille TMDL for temperature this week
